www.pangea.dk

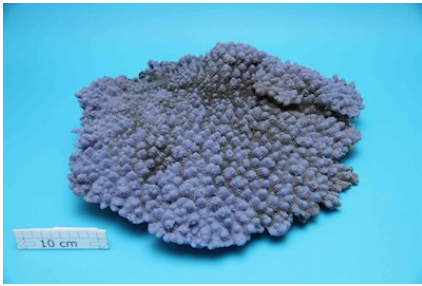

Pangea Rocks reconstructs accurate and realistic replicas of natural aquatic and land environments of any size, building meaningful and expertly designed exhibits with particular attention to animal welfare and curatorial requirements. These environments are crafted by a full in-house team of designers, artists and construction technicians, from conceptualization and architectural planning to project management and construction.

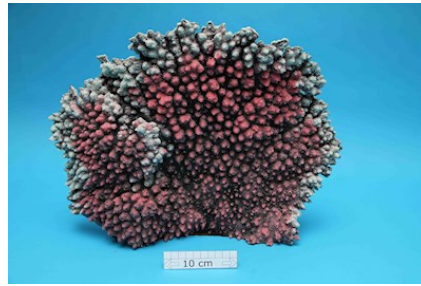

The Denmark-based company is the leading supplier of artificial corals and kelp in the world and enjoys a well-earned reputation in the rock-work market for its high standards of craftsmanship and meticulous attention to detail in creating and engineering solutions for aquariums, zoos and parks all over the world.

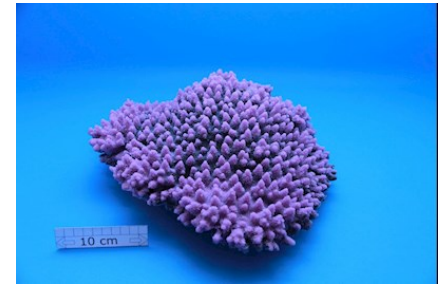

You can witness some of these works at industry giants such as Legoland, Sea Life, North Sea Centre, and the Danish National Museum, which figure among many others in Pangea Rocks' long list of recurring clients, reflecting its standards of quality and professional excellence. Pangea's Rocks can muster a staff of over 25 outstanding designers, artists, and Construction technicians with many years of international experience in the field Of artificial rock-work and replication of other natural aquatic and land features, Who provide a full in-house design-build capacity from conceptualization and Architectural planning and management, construction, project realisation, and Specialties installation. The fact that our previous clients often return for our Expertise with new projects reflects our high standards of quality, naturalistic accuracy and attention to detail.
