Black :Bla

Nearly all corals can be made in the colour of your choice, please remember also to specify colour as light, dark or dusty. Please contact us for further details.

All Pangea Rocks Corals are handmade by specialist so the colour can vary from coral to coral.

Due to the nature of the Polyurethane material, a small fading of colour can occur, depending on the light intensity in the tank. For this reason we on some corals over-color the corals to compensate for any loss of colour.

How to clean the corals for algae

The pangea corals can be cleaned in the tank by using a brush to scrub the coral

Or

The corals can be taken out of the tank and cleaned by using a dishwashing machine, or bleaching in a partial solution, Remember to wash the coral in clean water afterwards.
